Summary

Frontend Developer with 4 years of experience building scalable, responsive, and user-focused web applications. Specialized in React and TypeScript with strong foundations in modern JavaScript, state management, API integration, and performance optimization. Proven ability to collaborate with designers, backend engineers, and product teams to deliver polished interfaces that improve usability, conversion, and development efficiency.

Skills

React | JavaScript (ES6+) | TypeScript | HTML5 | CSS3 | Tailwind CSS | Redux | REST APIs | Git | Responsive Design | Performance Optimization | Component-Based Architecture | Cross-Browser Compatibility | Agile / Scrum

Experience

Frontend Developer

BrightLayer Technologies — Toronto, ON

Mar 2023 – Present

- Developed and maintained React and TypeScript features for a B2B analytics platform used by over 20,000 monthly active users.
- Built reusable UI components and shared frontend patterns that reduced duplicated code and improved development speed across teams.
- Integrated REST APIs for reporting, authentication, and account management workflows, improving data consistency and user experience.
- Collaborated with product designers to translate Figma designs into responsive,

accessible interfaces with Tailwind CSS.

- Improved page load performance by optimizing bundle size, lazy-loading modules, and refining rendering logic, contributing to faster dashboard interactions.

Frontend Developer

NovaCommerce Studio — Mississauga, ON

Jan 2021 – Feb 2023

- Delivered storefront and admin dashboard features for multiple e-commerce clients using React, JavaScript, Redux, and REST APIs.
- Implemented responsive product pages, filters, cart flows, and checkout UI that supported increased engagement and smoother purchase journeys.
- Partnered with backend developers to define API contracts and handle asynchronous data flows and state updates reliably.
- Refactored legacy frontend modules into modular, maintainable components, reducing UI bugs and simplifying future enhancements.
- Used Git-based workflows, code reviews, and sprint planning to contribute consistently in an Agile development environment.

Junior Frontend Developer

PixelForge Digital — Toronto, ON

Jun 2020 – Dec 2020

- Supported the development of marketing sites and internal web tools using HTML, CSS, JavaScript, and reusable UI components.
- Converted static mockups into responsive web pages with strong cross-browser compatibility and mobile usability.
- Assisted in debugging frontend issues, improving form behavior, and polishing user interactions across client projects.
- Contributed to version control workflows in Git and participated in peer reviews and QA handoff processes.

Projects

SaaS Metrics Dashboard

2024 | React, TypeScript, Tailwind CSS, Redux, REST API

- Designed and developed a responsive analytics dashboard for subscription-based businesses with KPI cards, chart modules, and role-based views.
- Implemented centralized state management and API-driven data visualization

workflows to support near real-time reporting experiences.

- Focused on component reusability, loading states, and performance optimization for a polished user experience.

Online Storefront Platform

2022 | React, JavaScript, CSS, Redux, REST API

- Built a modern e-commerce frontend featuring product listings, advanced filtering, cart management, and checkout flows.
- Improved responsiveness and UI consistency across desktop and mobile breakpoints.
- Structured reusable components and predictable state handling to simplify scaling and maintenance.

Education

Bachelor of Science in Computer Science

York University, Toronto, ON

Graduated: 2020

Certifications

- Meta Front-End Developer Professional Certificate
- JavaScript Algorithms and Data Structures Certification
