---

## SUMMARY

UI/UX Designer with 3+ years of experience creating user-centered digital products that balance business goals, usability, and visual clarity. Skilled in research, wireframing, prototyping, and design systems, with a strong focus on accessibility and cross-functional collaboration. Known for translating user insights into intuitive interfaces and shipping polished experiences with product managers, developers, and stakeholders.

---

## SKILLS

Figma, Adobe XD, Design Systems, Wireframing, Prototyping, User Research, Usability Testing, Accessibility, Information Architecture, Journey Mapping, Interaction Design, Responsive Design, Visual Design, Stakeholder Collaboration, Agile Workflow

---

## EXPERIENCE

UI/UX Designer | BrightLayer Studio | Austin, TX | Mar 2023 – Present

- Lead UX and interface design for SaaS and consumer web products, partnering with product managers and engineers from discovery through release.
- Conduct user interviews, competitive audits, and usability tests to uncover friction points and guide design decisions.
- Created wireframes, interactive prototypes, and polished UI in Figma for 8+ product features, reducing design-to-dev rework by 25%.

- Improved accessibility across key flows by applying WCAG-aligned color, contrast, and interaction standards, increasing inclusive usability for diverse users.
- Contributed to a shared design system by defining reusable components, spacing rules, and interaction states, improving consistency across product teams.
- Collaborated in sprint cycles to refine backlog priorities and ensure timely handoff, helping shorten average feature delivery time by 15%.

Junior Product Designer | Northpeak Digital | Dallas, TX | Jun 2021 – Feb 2023

- Supported design of mobile and web experiences for startup clients in fintech, e-commerce, and productivity tools.
  - Developed user flows, low- and mid-fidelity wireframes, and clickable prototypes to validate ideas early with stakeholders and users.
  - Assisted with usability testing sessions and synthesized findings into actionable recommendations that improved task completion and clarity.
  - Worked closely with developers to refine UI details, resolve implementation issues, and maintain design fidelity during build phases.
  - Helped standardize components and documentation for a growing product library, reducing inconsistent UI patterns across projects.
  - Delivered responsive design solutions that improved mobile usability and contributed to higher engagement on key customer journeys.
- 

## SELECTED PROJECTS

### SaaS Analytics Dashboard Redesign

Product type: B2B analytics platform

Problem solved: Users struggled to quickly interpret dense data and locate key performance metrics.

Design approach: Reorganized dashboard hierarchy, introduced customizable widgets, and used progressive disclosure to reduce cognitive load.

Result: Improved task efficiency in usability testing and increased dashboard feature adoption after launch.

### Mobile E-commerce Checkout Optimization

Product type: Mobile shopping app

Problem solved: High checkout abandonment due to unclear steps and limited

trust cues.

Design approach: Simplified the flow, reduced form friction, added clearer error handling, and optimized mobile touch targets.

Result: Reduced checkout drop-off and improved conversion on mobile transactions.

Healthcare Appointment Booking App

Product type: Patient scheduling application

Problem solved: Users had difficulty finding available appointments and completing booking on the first attempt.

Design approach: Designed a streamlined search, filtering, and booking flow with accessible components and plain-language microcopy.

Result: Increased successful appointment completion and improved overall booking satisfaction.
